Test Definition: MTBV2

Antimicrobial Susceptibility, Mycobacterium tuberculosis Complex, Broth Method

Reporting Title: Susceptibility, Mtb Complex, Broth
Performing Location: Rochester

Specimen Requirements:

Specimen Type: Organism
Container/Tube: Middlebrook 7H10 agar slant
Specimen Volume: Isolate
Collection Instructions:
1. Organism must be in pure culture, actively growing.
2. Place specimen in a large infectious container (Supply T146) and label as an etiologic agent.
Additional Information:
1. Specimen source and suspected organism identification are required.
2. CTB/8205 Mycobacterial Culture or CTBID/80278 Culture Referred for Identification, Mycobacterium must also be ordered and will be charged separately unless identification of organism is provided.
3. See Infectious Specimen Shipping Guidelines in Special Instructions for shipping information.
Forms: If not ordering electronically, submit a Microbiology Request Form (Supply T244) with the specimen.

Specimen Type	Temperature	Time
Varies	Ambient (preferred)	
	Refrigerated
