NEW TEST ANNOUNCEMENT REFERRAL
NOTIFICATION DATE: November 8, 2012
EFFECTIVE DATE: December 13, 2012

OVA1

Test ID: FOVA1

EXPLANATION: The following new orderable, referred to Quest Diagnostics Chantilly will be available December 13, 2012.

REFERRAL LAB CODE: 16991

METHODOLOGY: Electrochemiluminescence (ECLIA)

REFERENCE VALUES:
OVA1 Test Value
Interpretive Criteria for Probability of Malignancy

	Low	High
Premenopausal	<5.0	> = 5.0
Postmenopausal	<4.4	> = 4.4

The OVA1 Test is based on a proprietary FDA-cleared software device that combines into a single numerical result; the results of Beta-2 microglobulin, Transferrin, Transthyretin, Apolipoprotein A1 and CA 125 II (Roche Elecsys). These tests should be ordered independently if clinically indicated. The OVA1 Test is an aid to further assess the likelihood that malignancy is present when the physician's independent clinical and radiological evaluation does not indicate malignancy.

SPECIMEN REQUIREMENTS:

Draw blood in a plain red-top tube(s). (Serum gel tube is acceptable.) Spin down and submit 2.2 mL of serum frozen in a plastic vial.

Note: OVA1 Test is not to be used if patient is known to have rheumatoid factor of > or = 250 IU/L. Triglycerides above 450 mg/dL may interfere with the assay and should not be used. The test is not indicated for patients with diagnosis of malignancy within the last 5 years.

SPECIMEN STABILITY INFORMATION:

Specimen Type	Temperature	Time
Serum	Frozen (preferred)	63 days
	Refrigerated	5 days

FEE: $675.00 **CPT CODE**: 84999

DAY(S) SET UP: Monday through Saturday **ANALYTIC TIME**: 1 day
