Reporting Title: Pathology Consultation
Performing Location: Rochester

Specimen Requirements:

A preliminary pathology report and brief history are required for all Pathology Consultations.

Specimen Type: Tissue
Container/Tube: Pathology Packaging Kit (Supply T554)
Collection Instructions: Submit hematoxylin and eosin (H and E) and all special stains performed on the case. Include unstained slides and/or a formalin-fixed, paraffin-embedded tissue block if it is anticipated that additional stains or ancillary testing may be necessary. Unstained slides for immunohistochemistry should be charged, if possible, as not all immunohistochemical stains can be performed on uncharged slides. If electron microscopy has been performed, include EM images (either on a CD or as prints).
Additional Information:
1. A brief explanatory note or consultative letter is also recommended.
2. Attach the green "Attention Pathology" address label included in the kit to the outside of the transport container.
3. This test is not intended for use with wet tissue (tissue that still needs to be processed).
Forms:
1. Hematopathology Patient Information Sheet (Supply T676) in Special Instructions
2. Pathology/Cytology Information Sheet (Supply T707) in Special Instructions

Specimen Type	Temperature	Time
Varies	Ambient (preferred)	
	Frozen	
	Refrigerated
