Reporting Title: Subcutaneous Fat Aspirate
Performing Location: Rochester

Specimen Requirements:

Container/Tube: Glass slides or sterile container
Specimen Volume: Minimum of 4 slides or 1 cubic mm
Collection Instructions:
1. Sterilize and anesthetize a small area of the anterior abdominal wall.
2. Aspirate subcutaneous fat through a large bore needle.
3. Apply the fat obtained in the syringe directly to a glass slide and crush with a second slide.
4. Air dry the slides and send without fixative.
5. Alternately, send fat in small container of saline.

Additional Information: The following information is required:
a. Patient's date of birth
b. Name and telephone number of ordering physician
c. Pertinent clinical information
