REFERRAL TEST UPDATE

NOTIFICATION DATE: December 7, 2010
EFFECTIVE DATE: January 11, 2011

EXPLANATION OF CHANGE: ***Effective January 11, 2011,*** the following changes will be made to file definition for the tests we forward per client request to another laboratory. When ordering miscellaneous tests clients will be prompted by our system for additional order attributes. The major differences are as follows:

Current Test Code	Current Name	New Test Name	Prompt at ordering?
901	Test Name	**Test Name**	**YES**
903	Result	Result	
904	Flag	Flag	
905	Normal	Reference Value	
906	Unit of Measure	Unit of Measure	
New		**Referral Lab Code**	**YES**
New		**Specimen Type**	**YES**

You will be **prompted** to provide **Test Name, Referral Lab Code** (code of the actual performing laboratory) and **Specimen Type**. If these fields are not completed we will contact you for verification prior to shipping the specimens outside of Mayo Medical Laboratories. Referral Lab Codes can be obtained by querying performing laboratory websites or using the *Referred Tests List* guide available in the catalog section of mayomedicallaboratories.com. By clarifying these order attributes, we will be better able to ensure that the correct testing is performed on submitted specimens.

BUILD Reminders: If you use our test forwarding service and order Miscellaneous Referral (ZW#) tests through your interface, tests **must** be ordered using a Generic Orderable (GO) test. Mayo Medical Laboratories will format its GO test so that results data like reference values and results flags will report under the headers. Please be aware that if your organization builds Miscellaneous Referral test discreetly, Mayo Medical Laboratories will be unable to format results consistently for you and results data will be reported as discrete results.

Mayo Medical Laboratories
Miscellaneous Tests XXXXXX

Mnemonic	Unit Code	Lab Name
ZW190	91598	Alfred I. duPont Hosp for Children-Gastroenterology
ZW199	91796	Alfred I. duPont Hospital for Children-Molecular
