REPORTABLE DISEASE COMMENT

EXPLANATION: Results of tests performed at Mayo Medical Laboratories will sometimes have a "Reportable Disease" comment attached to them. The criteria for that comment appearing has been based upon Minnesota Department of Health Guidelines. Recognizing that comment may not be appropriate based on the patient's state of origin, we're working to remove that comment from our results. Mayo Medical Laboratories will continue to communicate all reportable disease results to the appropriate state health department, but a comment may not be attached to the results. The list of tests below are tests that will continue to have that comment attached after our LIS conversion on November 18th. As our initiative progresses, the "Reportable Disease" comment will be removed from these test results as well.
