TEST OBSOLETE
NOTIFICATION DATE: March 19, 2013
EFFECTIVE DATE: April 19, 2013

ADENOVIRUS (ADV) DETECTION BY IN SITU HYBRIDIZATION

Test ID: 81444
Secondary ID: 81444

EXPLANATION: On April 19, 2013, due to minimal utilizations, MML will obsolete Adenovirus In Situ Hybridization (ISH) testing. Alternatively, clients may request identification of this organism on paraffin-embedded tissue by ordering a surgical pathology consultation – Mayo test ID: 5439. If indicated, a new Adenovirus immunohistochemical (IHC) stain will be ordered and used by a Mayo pathologist to confirm the presence of this organism.

RECOMMENDED ALTERNATIVE TEST: #5439, Surgical Pathology Consultation
Reflex Tests:

Test ID	Reporting Name	Available Separately	Always Performed
86113	Path Consult, w/Comp Rvw of History	No	No
83614	Path Consult, Outside Slide	No	No
88323	Path Consult, w/Slide Prep	No	No

Testing Algorithm:
When this test is ordered, 1 of the 3 reflex tests will be performed and charged. Each additional stain will be charged separately.

Note: Special stains performed outside Mayo Medical Laboratories and included with the case may be repeated and charged at the reviewing pathologist's discretion. In addition, testing requested by referring physician (immunostains, molecular studies, etc.) may not be performed if deemed unnecessary by Mayo pathologist. For all surgical pathology consultations, auxiliary testing is ordered at the discretion of the Mayo pathologist.

USEFUL FOR: Obtaining a rapid, expert second opinion.

REFERENCE VALUES: Interpretive report will be faxed.

SPECIMEN REQUIREMENTS:
Preliminary pathology report and history are required.

Attach the green pathology address label included in the kit to the outside of the transport container.

Specimen Type: Tissue

Container/Tube: Surgical Pathology Packaging Kit (Supply T554)

Collection Instructions: Submit hematoxylin-and-eosin (H&E) and special stained/unstained slides and/or a formalin-fixed, paraffin-embedded tissue block.
Additional Information: A brief explanatory note or consultative letter is also recommended.

CPT CODES:
Pathology Consultation, Outside Slides 88321 (if appropriate)

Pathology Consultation, with Slide Preparation 88323 (if appropriate)

Pathology Consultation, with Comprehensive Review of History 88325 (if appropriate)

ANALYTIC TIME: 2 – 8 days; Note: Cases requiring additional staining and ancillary testing may require additional time

DAY(S) SET-UP: Monday through Friday; Upon arrival
