

PROTEIN, TOTAL, CSF
#872

EXPLANATION: On June 9, 2009, we will begin using a new reference value for total protein in CSF. The revision in the reference value is in response to the manufacturer's calibrator set point adjustment to more closely match its Biuret reference method. No other changes to this test will be implemented at this time.

CURRENT REFERENCE VALUES: 14-45 mg/dL

NEW REFERENCE VALUES: < or = 35 mg/dL

QUESTIONS: Contact your Mayo Medical Laboratories' Regional Manager
