

**BACTERIAL ANTIGEN DETECTION PANEL
 #91908**

EXPLANATION OF CHANGE: Effective immediately, Unit Code 91908, Bacterial Antigen Detection Panel, referred to Focus Diagnostics, Inc., will be updated to reflect the addition of a source test parameter and a new unit code always message:

	CURRENT	NEW
Unit Code Always Message:	This is a presumptive test for the direct qualitative detection of bacterial antigen. This test is not intended as a substitute for a Gram stain and bacterial culture. Confirmatory diagnosis of bacterial meningitis is only possible with appropriate culture procedures. Samples with extremely low levels of antigen may yield negative results. Nonspecific reactions are known to occur, especially with urine samples. Cross-reactions and interference by rheumatoid factor and other substances have also been reported.	This test should not be used as a substitute for gram stain and bacteriologic cultures in the diagnosis of septicemia and/or meningitis. Positive or negative test results should be considered presumptive and confirmed by culture.
