UNIT CODE ALWAYS MESSAGE - [Z91788N]

In the presence of antibody to the FceR1, basophils degranulate resulting in the increased expression of a specific basophil marker.

The expression of this marker is determined after incubation of susceptible donor basophils with serum from the patient.

This test uses a kit/reagent designated by the manufacturer as for research use, not for clinical use. The performance characteristics of this test have been validated by Advanced Diagnostic Laboratories at National Jewish Health. It has not been cleared or approved by the US Food and Drug Administration. The results are not intended to be used as the sole means for clinical diagnosis or patient management decisions. This laboratory is certified under the Clinical Laboratory Improvement Amendments of 1988 (CLIA-88)as qualified to perform high complexity clinical laboratory testing.
