Pipecolic Acid, S

Specimen	Serum	MCR
Specimen ID	1039976	MCR
Order Date	15 Oct 2010 13:30	MCR
Reason For Referral	Reason for referral not provided.	MCR
Method	Gas Chromatography-Mass Spectrometry (GC-MS) Stable Isotope Dilution Analysis	MCR
Pipecolic Acid, S	H 8 nmol/mL	0.70-2.50 MCR
Interpretation	<p>In this sample, the concentration of pipecolic acid was elevated. This result is suggestive of a possible underlying peroxisomal disorder. If not performed already, we recommend analysis of plasma very long-chain fatty acids. We need clinical information to provide further interpretation. If a specific diagnosis is eventually established, methods to evaluate therapies of these disorders are coordinated at the Kennedy Krieger Institute in Baltimore, (phone: 443-923-2772; fax: 443-923-2755; email:steinbergs@KennedyKrieger.org).</p>	
Reviewed By	Michelle Dawn Fjerstad	MCR
