**Lupus Anticoagulant**

Lupus Anticoagulant	SEE BELOW	Not Detected	REF
---------------------	-----------	--------------	-----

A Lupus Anticoagulant is detected.  
 Lupus Anticoagulants (LA) may be associated with thrombotic events, recurrent abortion, or may be asymptomatic. A bleeding history requires other coagulopathies be excluded. Since LA may be transient, international consensus guidelines suggest waiting at least 12 weeks before retesting to confirm antibody persistence. (J Thromb Haemost 2006:4;295). This interpretation is based on the following test results:

PTT-LA Screen	H	42	sec	< or = 40	REF
---------------	---	----	-----	-----------	-----

**dRVVT Screen**

dRVVT Screen	H	79	sec	< or = 42	REF
