			TEST CODE ALWAYS MESSAGE - [Z89459]			
			Z89459 Laboratory developed test.			
			Fluorescent DNA sequence analysis was used to test for the presence of mutations in all 9 exons and exon-intron boundaries of the TGFBR1 gene.			
			A genetic consultation may be of benefit.			
			A list of common polymorphisms identified for this patient is available from the lab upon request.			
			CAUTIONS:			
			Rare polymorphisms exist that could lead to false negative or positive results. If results obtained do not match the clinical findings, additional testing should be considered.			
			Test results should be interpreted in the context of clinical findings, family history, and other laboratory data.			
			Misinterpretation of results may occur if the information provided is inaccurate or incomplete.
