

SPECIMEN UPDATE

MML JACKSONVILLE

NOTIFICATION DATE: October 24, 2011

EFFECTIVE DATE: November 1, 2011

MICROBIOLOGY TESTING

EXPLANATION: Effective November 1, 2011 specimen source information will be required to initiate microbiology culture and molecular testing. Specimen source information is an important factor in providing a valid clinical result. If source information is not provided at the time of specimen submission, Mayo Medical Laboratories will contact you to determine the source before testing is initiated. This could delay testing, and cancelation of testing is possible if a source cannot be provided.

QUESTIONS: Contact your Mayo Medical Laboratories' Regional Manager or
MML Laboratory Technologist Support
