Test	Flag	Results	Unit	Reference Value	Perform Site*
<b>Poliovirus (Types 1-3) Ab, CSF</b>			REPORTED 02/23/2012 13:09		
Poliovirus 1 Ab		<1:1			Y03 8
Poliovirus 2 Ab	H	<span style="border: 1px solid black;">1:1</span>			Y03 8
Poliovirus 3 Ab		<1:1			Y03 8

REFERENCE RANGE: <1:1

INTERPRETIVE CRITERIA:

<1:1 Antibody Not Detected  
> or = 1:1 Antibody Detected

Diagnosis of infections of the central nervous system is accomplished by demonstrating the presence of intrathecally-produced specific antibody. Interpretation of results may be complicated by low antibody levels found in CSF, passive transfer of antibody from blood, and contamination via bloody taps. The interpretation of CSF results must consider CSF-serum antibody ratios to the infectious agent.

This test was developed and its performance characteristics have been determined by Focus Diagnostics. Performance characteristics refer to the analytical performance of the test.
