| FLT3 (ITD) and D835 Variant Det Specimen | | Peripheral Blood | REPORTED 11/ | 08/2012 10:48 | Y06 2 |
| FLT3 Internal Tandem Duplication | | Negative | | | Y06 |
| FLT3 D835 Variant | | Negative | | | 2 Y06 2 |
| Comment | | N/A | | | Y06 2 |
| Interpretation | | | | | Y06 2 |

The ITD PCR yielded a PCR product of $327\mathrm{bp}$. This indicates the Absence of the Internal Tandem Duplication. The D835 PCR did not yield a PCR product of $127\mathrm{bp}$. This indicates the Absence of a D835 Variant.

This test was developed and its performance characteristics determined by the Laboratory for Personalized Molecular Medicine. It has not been cleared or approved by the U.S. Food and Drug Administration. However, such approval is not required for clinical implementation, and test results have been shown to be clinically useful. The Laboratory of Personalized Molecular Medicine is CLIA certified to perform high complexity testing.
