

# **Test Definition: FHVP**

Hepatitis A (HAV) SuperQual by PCR

Reporting Title: HAV RNA Qual PCR Assay-SuperQual

Performing Location: National Genetics I

# **Specimen Requirements:**

Submit only 1 of the following:

#### Plasma

Draw blood in a yellow-top (ACD) or purple-top (EDTA) tube(s). Spin down and send 1 mL ACD or EDTA plasma frozen in a plastic vial.

#### Serum

Draw blood in a plain red-top tube(s). Spin down and send 1 mL serum frozen in a plastic vial.

| Specimen Type | Temperature | Time |
|---------------|-------------|------|
| Varies        | Frozen      |      |

# **Result Codes:**

| Result ID | Reporting Name | Туре         | Unit | LOINC® |
|-----------|----------------|--------------|------|--------|
| Z1262     | HAV RNA        | Alphanumeric |      | 7904-6 |

**CPT Code:** 1 × 84999

## **Reference Values:**

## PCR notes:

- 1. A positive result indicates the presence of target-specific nucleic acid sequence.
- 2. Positive Controls indicate sensitivity to 1 copy per 10uL extracted.
- 3. Negative Controls demonstrated no target-specific nucleic acids.

PCR Assay Performed Using National Genetics Institute's Validated, Proprietary Methodology.

Test Performed by: National Genetics Institute 2440 S. Sepulveda, Suite 130 Los Angeles, CA 90064
