Cryptococcus Ag Titer, LFA, S	AB	1:10		Negative	SDL

RECEIVED: 03/28/2014 09:01 REPORTED: 03/28/2014 09:15

SEMI-URGENT RESULT

The cryptococcal antigen detection method was changed from a latex agglutination (LA) test to a lateral flow immunoassay (LFA) test in May, 2014. End point titers are not interchangeable and do not correlate between the two methods.

Providers should transition to monitoring end-point titers by the LFA method. End-point titer values by the LA method will be reported alongside the LFA titer result for comparison until August, 2014, at no charge. After this date, only the LFA titer will be performed.

Latex Agglutination Titer: 1:2
