TEST REQUESTED	HI	LO	REF RANGE	PERFORM SITE *
----------------	----	----	-----------	----------------

**Methylmalonic Acid, QN, P**

Methylmalonic Acid, QN, P	H	0.42	nmol/mL	0.00-0.40	MCR
---------------------------	---	------	---------	-----------	-----

In this sample, the concentration of methylmalonic acid (MMA) was minimally elevated. As the upper limit of the reference range varies in different laboratories from 0.4 to 0.6 nmol/mL, this finding could be considered normal, especially if the patient does not show other signs of vitamin B12 deficiency.
