Filaria IgG4 Antibody, ELISA

Filaria IgG4 Antibody NEGATIVE

REFERENCE RANGE: NEGATIVE

This assay detects filarial IgG4 associated with infections caused by the major filarial parasites, including Dirofilaria immitis, Wuchereria bancrofti, Brugia malayi, and Onchocerca volvulus. Detection of IgG4 subclass antibody offers enhanced specificity without sacrifice of sensitivity. Chronic filarial infections manifesting as elephantiasis may not show a significant IgG4 response, and cannot be ruled out by this assay.

Test Performed by:Focus Diagnostics, Inc.
