Patient Name REPORTVALIDATION, AUTOMATION SAIA	Patient ID RVSAIA150	Age 50	Gender F	Order # RVSAIA150
Ordering Phys				DOB 01/01/1961
Client Order # RVSAIA150	Account Information			Report Notes
Collected 11/28/2011 09:24	C7028846-DLMP ROCHESTER 3050 SUPERIOR DRIVE			
Printed 11/29/2011 10:51	ROCHESTER,MN 55901			

A pancreatic cyst fluid amylase concentration of $<250~\mathrm{U/L}$ indicates a low risk of a pseudocyst and is more consistent with cystic neoplasms such as mucinous cystic neoplasms (MCN), intraductal papillary mucinous neoplasm (IPMN), serous cystadenomas, cystic neuroendocrine tumor, and mucinous cystadenocarcinoma. This test result should be interpreted in the context of clinical presentation, imaging and cytology findings. The testing method is a substrate kinetic assay manufactured by Roche Diagnostics Inc. and performed on the Modular or Cobas system. Values obtained with different assay methods or kits may be different and cannot be used interchangeably. Test results cannot be interpreted as absolute evidence for the presence or absence of malignant disease.
