Macroprolactin, S

Prolactin, Total, S

20.0 ng/mL

SDL

Reference Value
4.8-23.3

Prolactin, Unprecipitated, S

16.0 ng/mL

SDL

Comment

SDL

Macroprolactin was NOT detected. 50% or less of serum prolactin precipitated following incubation with polyethylene glycol. Total prolactin is within the age/gender stratified reference intervals, but this does not fully exclude the possibility of a pituitary lesion. These results should be interpreted in the context of patient presentation and other clinical findings.

Percent

20 %
