Chlamydia PCR		Negative			Y11 7

Chlamydia PCR

Reference Note: This test employs PCR and agarose gel electrophoresis detection of a chlamydia pneumoniae-specific conserved genetic target. A positive result should be coupled with clinical indicators for diagnosis. A negative CHLPPCR result does not exclude chlamydia involvement in a disease process. This test was developed and its performance characteristics determined by the UCH Clinical Laboratory. It has not been cleared or approved by the U.S. Food and Drug Administration. The FDA has determined that such clearance or approval is not necessary. This test is used for clinical purposes. It should not be regarded as investigational or for research. This laboratory is certified under the Clinical Laboratory Improvement Amendment of 1988 ("CLIA") as qualified to perform high complexity clinical testing.
