

Parathyroid Hormone, Fine-Needle Aspiration  
Biopsy (FNAB)-Needle Wash

Patient ID <b>SA00048480</b>	Patient Name <b>SAMPLEREPORT, NORMAL PTHFN</b>	Birth Date <b>1960-01-01</b>	Gender <b>F</b>	Age <b>52</b>
Order Number <b>SA00048480</b>	Client Order Number <b>SA00048480</b>	Ordering Physician <b>Client, Client</b>	Report Notes	
Account Information <b>C7028846 DLMP Rochester</b>		Collected <b>13 Aug 2012 00:00</b>		

**PTH, FNAB, Needle Wash**

SDL

**56 pg/mL**

Parathyroid hormone (PTH) values <100 pg/mL suggest that the biopsied site does not contain PTH secreting tissue. This result is dependant on accurate sampling and a total needle wash volume of ≤1.5 mL.

This test should be interpreted in the context of the clinical presentation, imaging and cytology findings. If the results are

discordant with the clinical presentation, a sampling error at the time of the biopsy should be considered.

**ADDITIONAL INFORMATION**

The testing method is an electrochemiluminescence assay manufactured by Roche Diagnostics Inc. and performed on the Modular or Cobas System.

Values obtained with different assay methods or kits may be different and cannot be used interchangeably.
