<b>Alpha-Galactosidase, BS</b>				REPORTED 02/06/2013 16:01	
Reason For Referral		Not provided			MCR
Alpha-Galactosidase, BS	L	0.5	nmol/mL/h	>=2.8	MCR
Interpretation					MCR
<p>In this specimen, the activity of alpha-galactosidase enzyme is reduced indicating that this individual is a carrier for Fabry disease (OMIM #301500). Carriers may or may not be symptomatic. If clinically indicated, consider follow-up investigations to include molecular genetic analysis of the GLA gene (MML 88264). If not already ordered, this could be done on the existing sample by calling MML within one month. In addition, the Fabry Registry website (<a href="http://www.Fabryregistry.com">http://www.Fabryregistry.com</a>) provides information and resources for health professionals and families.</p> <p>Please contact the Biochemical Genetics consultant or genetic counselor on call (1-800-533-1710) if you have any questions.</p> <p>Fluorometric Enzyme Assay</p>
