

Inherited Conjugated Hyperbilirubinemias, 24
Hour, Urine

Patient ID SA00053694	Patient Name SAMPLEREP, CI AB	Birth Date 1967-04-07	Gender F	Age 45
Order Number SA00053694	Client Order Number SA00053694	Ordering Physician Client, Client	Report Notes	
Account Information C7028846 DLMP Rochester		Collected 11 Feb 2013 00:00		

Inher Conj Hyperbilirubinemias, U

Copro I + III

176 mcg/24 h

High

MCR

Reference Value
8–110

Urine Volume

1100 mL

MCR

Interpretation (CI)

MCR

In this sample, the excretion of total coproporphyrins was mildly elevated. The percentage of coproporphyrin I relative to total coproporphyrin (I + III) was elevated. This result may be indicative of heterozygosity for Rotor syndrome. Please be advised this assay is not useful for the evaluation of porphyria patients.

ADDITIONAL INFORMATION

High-Performance Liquid Chromatography (HPLC) with fluorescence detection

Received: 12 Feb 2013 14:52

Reported: 12 Feb 2013 15:01

% Copro I

47 %

High

MCR

Reference Value
