BCR/ABL, RNA-Qual, Diagnostic					
RECEIVED: 07/29/2013 08:00 REPORTED: 07/29/2013 10:54					
Specimen Type		Peripheral blood			MCR
Final Diagnosis:		Peripheral blood, BCR/ABL mRNA analysis, qualitative:			MCR

Peripheral blood, BCR/ABL mRNA analysis, qualitative:

Negative. No BCR/ABL mRNA transcripts were detected.

Signing Pathologist: Jennifer Herman
 Method summary-BCR/ABL, qualitative: The presence or absence of BCR/ABL mRNA transcripts (bcr/abl) was evaluated using a qualitative, reverse transcription PCR -based assay. The assay detects essentially all published and theoretical bcr/abl fusion forms. The assay is intended to be used at the time a diagnosis is being made and should not be used to monitor bcr/abl levels in patients with a prior diagnosis of a bcr/abl-positive neoplasm. For monitoring, order either test #89007 (quantitative p210) or test #83336 (quantitative p190) based on the patient's fusion form. See the Mayo Medical Laboratories Interpretive Handbook for method details. Please call the Mayo Molecular Hematopathology Laboratory at 507-266-0489 if you have questions regarding bcr/abl analysis. Laboratory developed test.
