PCA3 Assay			REPORTED	10/10/2012 10:29	
Specimen type		urine			Y03 2
Result (PCA3 Score)		29			Y03 2
Interpretation		Positive			Y03 2
<p>A positive result is associated with an increased likelihood of a positive biopsy for prostate cancer.</p> <p>Reference Range: < 25 negative > or = 25 positive</p> <p>Comment: Due to normal assay variability, specimens with PCA3 scores near the cut-off of 25 (i.e. 18-31) could yield a different overall interpretation of positive or negative upon repeat testing. PCA3 scores in the range from 18 to 31 should, therefore, be interpreted with caution.</p> <p>The testing method is target capture, transcription-mediated amplification (TMA) and hybrid protection assay (HPA), manufactured by Gen-Probe and performed using the Gen-Probe PROGENSA assay kit.</p>
