MGMT Methylation Assay		REPORTED 01/03/2013 12:22			
Result:		See Below			Y061
Result: Gene Methylation NOT detected Methylation of the MGMT (O(6)-methylguanine-DNA methyltransferase)gene was not detected using methylation specific PCR technologies					
Methylation Score:		1.23			Y061
-- REFERENCE VALUE -- unmethylated <2.00 methylated >=2.00					
Block Number:		S12-22772			Y061
Director Review:					Y061

Ying Wang, M.D., Ph.D., FACMG
Associate Director, Molecular Genetics
LabCorp Center for Molecular
Biology and Pathology
Research Triangle Park, NC
1-800-533-0567

Methodology:
DNA is isolated from formalin-fixed, paraffin-embedded (FFPE) specimen. Molecular analysis of the MGMT gene is performed by methylation-specific PCR and detected on ABI7900. The MGMT and beta-Actin copy numbers will be used to calculate the ratio of MGMT/beta-Action x1000. Molecular-based testing is highly accurate, but as in any laboratory test, rare diagnostic errors may occur. Results of this test are for Investigational Purposes Only. The performance characteristic of this assay have been determined by LabCorp. The result should not be used as a diagnostic procedure without confirmation of the diagnosis by another medically established diagnostic product or procedure.
