Thyroglobulin Antibody, S		<20	IU/mL	<116	SDL

RECEIVED: 06/12/2013 11:30 REPORTED: 06/12/2013 11:32
 If thyroglobulin antibody measurement is performed to assess the reliability of the thyroglobulin assay for thyroid cancer patient follow-up, a thyroglobulin antibody result =>22 IU/mL may result in falsely decreased thyroglobulin values.

The thyroglobulin antibody testing method is an electrochemiluminescence assay manufactured by Roche Diagnostics Inc. and performed on the Modular or Cobas system.

Values obtained from different assay methods or kits may be different and cannot be used interchangeably.

* Performing Site:
