Immunofixation, CSF

Interpretation:

Y096

Reference Range:

**NO MONOCLONAL PROTEINS
DETECTED**

Immunofixation studies revealed one trace concentration band(s) migrating in the GAMMA region which appear(s) to type as IGG KAPPA monoclonal protein(s). Also, one trace concentration band(s) migrating in the GAMMA region which was/were of too low a concentration to definitively identify

This test was developed and its performance characteristics have been determined by Quest Diagnostics Nichols Institute, San Juan Capistrano. It has not been cleared or approved by the U.S. Food and Drug Administration. The FDA has determined that such clearance or approval is not necessary. Performance characteristics refer to the analytical performance of the test.
